

RELEASE NOTES

Apptimized v5.7

Released July 26, 2017

Purpose

The purpose of this document is to detail the enhancements now available in v5.7 of the Apptimized automated application packaging toolset.

Introduction

Apptimized is an automated application packaging toolset, providing end-users with a web-based packaging capability via an online portal.

The toolset has been developed to reduce the complexity and time taken to create application packages in either MSI or App-V formats for deployment to MS Windows Desktop and Terminal Server platforms.

Apptimized is a proprietary technology supported by a team of in-house developers.

Apptimized can be accessed via <https://www.apptimized.com>
